Exam : **1z0-998**

Title : Oracle Database Cloud Service
2019

Vendor : Oracle

Version : DEMO

NO.1 Which type of DB system(s) would provide Instance isolation?

- A. Virtual Machine DB systems only
- B. Bare metal and virtual machine DB systems
- C. Bare metal DB systems only
- D. Exadata DB systems only

Answer: C

NO.2 What are the three considerations provided by the shapes for bare metal and VM DB systems?

- A. For all the shapes of the bare metal DB systems, CPUs can be scaled up.
- B. For all the shapes of the VM DB systems, a two node DB system can be created.
- C. For all the shapes of the bare metal DB systems, there can only be one node.
- D. For all the shapes of the VM DB systems, storage can be scaled up.
- E. For all the shapes of the DB systems, block volume storage can be used.

Answer: B,C,D

NO.3 Which three are the prerequisites and conditions for the recovering a database from Object Storage?

- A. VCN must be configured with dynamic routing gateway.
- B. DB system must have access to the applicable Swift endpoint or Object Storage.
- C. Database must be in archivelog mode.
- D. VCN must be configured with a service gateway.
- E. An auth_token is generated by Oracle Cloud Infrastructure.

Answer: B,D,E

Explanation

<https://docs.cloud.oracle.com/en-us/iaas/Content/Database/Tasks/recoveringOS.htm>

NO.4 Examine the command:

```
dbcli describe-component
```

What information will you get by executing this command?

- A. displays the latest patch available for the DB system
- B. displays the installed patch versions for the DB system
- C. displays all the components related to the Object Storage
- D. displays all the storage objects created

Answer: B

Explanation

<https://docs.cloud.oracle.com/en-us/iaas/Content/Database/References/dbacl.htm> Use the dbcli describe-component command to show the installed and available patch versions for the server, storage, and/or database home components in the DB system.

NO.5 Which two statements are true about using the Object Storage for the backups?

- A. Availability is low but the durability of the backup is high.
- B. Virtual Cloud Network must be configured with dynamic routing gateway.
- C. Virtual Cloud Network must be configured with an internet gateway.

- D. Availability and durability of the backup is high.
- E. Availability is high but the durability of the backup is low.

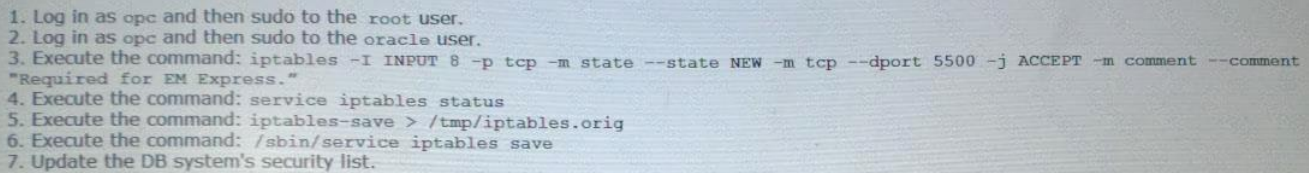

Answer: C,D

NO.6 You want to launch a DB system that is less expensive and can be used for test and dev environments. Which type of DB system would satisfy the requirement?

- A. Exadata DB system
- B. VM DB system
- C. Autonomous transaction processing
- D. Bare metal DB system

Answer: B

NO.7 Examine the steps to enable a port on the DB system.

```
1. Log in as opc and then sudo to the root user.
2. Log in as opc and then sudo to the oracle user.
3. Execute the command: iptables -I INPUT 8 -p tcp -m state --state NEW -m tcp --dport 5500 -j ACCEPT -m comment --comment
"Required for EM Express."
4. Execute the command: service iptables status
5. Execute the command: iptables-save > /tmp/iptables.orig
6. Execute the command: /sbin/service iptables save
7. Update the DB system's security list.
```

Identify the required steps in the correct order.

- A. 1,5,3,4,6,7
- B. 2,5,3,4,6,7 :
- C. 2,3,5,6,4,7
- D. 1,3,5,6,4,7

Answer: D
